SUMMARY

Full-Stack Web Developer experienced in PHP, Laravel, Python, WordPress, HTML5, CSS3, JavaScript, Tailwind CSS, and Bootstrap. Skilled in building scalable web applications, responsive UI/UX, database management (MySQL/PostgreSQL), API integrations, automation workflows, and agile development. Experienced in developing management systems, analytics dashboards, and social media automation tools using Docker, NGINX, Git, and modern web technologies.

EXPERIENCE

Software Engineer | Custom WordPress Theme

March 2026

Company Website

- Engineered a fully custom WordPress theme from scratch using PHP, HTML5, CSS3, JavaScript, and Bootstrap/Tailwind CSS.
- Implemented responsive layouts, optimized performance, and customized backend functionality to enhance user experience and content management.
- Integrated plugins, dynamic features, and SEO-friendly architecture to support business workflows and improve scalability.

Software Engineering Intern | WordPress Themes

January 2026

Thy Web Development Inc.

- Contributed as a Software Engineering Intern, developing a customizable WordPress theme for client and company use.
- Built reusable components using PHP, SCSS, JavaScript, and WordPress template hierarchy to enable flexible customization.
- Enhanced UI/UX, responsiveness, and performance while implementing theme customization features for diverse business requirements.

Software Developer | Risk Analytics for Adolescents

August 2025

POPCOM (Capstone)

- Developed and trained an AI model using real-world datasets to identify patterns and generate predictive insights.
 - Preprocessed and cleaned data, engineered features, and optimized model performance for improved accuracy and reliability.
 - Evaluated model outputs using standard metrics and applied insights to enhance decision-making and system predictions.
-
