SUMMARY

Full-Stack Web Developer experienced in PHP, Laravel, Python, WordPress, HTML5, CSS3, JavaScript, Tailwind CSS, and Bootstrap. Skilled in building scalable web applications, responsive UI/UX, database management (MySQL/PostgreSQL), API integrations, automation workflows, and agile development. Experienced in developing management systems, analytics dashboards, and social media automation tools using Docker, NGINX, Git, and modern web technologies.

EXPERIENCE

Software Engineer | Custom WordPress Theme March 2026

Company Website

- Engineered a fully custom WordPress theme from scratch using PHP, HTML5, CSS3, JavaScript, and Bootstrap/Tailwind CSS, delivering a responsive and maintainable website tailored to business requirements.
- Implemented responsive layouts, performance optimizations, and custom backend functionality, improving user experience, page load speed, and content management efficiency.
- Integrated WordPress plugins, dynamic features, and SEO-friendly architecture, increasing website scalability, search visibility, and support for evolving business workflows.

Software Engineering Intern | WordPress Themes January 2026

Thy Web Development Inc.

- Contributed as a Software Engineering Intern by developing a customizable WordPress theme for client and internal company projects, enabling efficient website deployment across multiple use cases.
- Built reusable theme components using PHP, SCSS, JavaScript, and the WordPress template hierarchy, streamlining customization and reducing development time.
- Enhanced user interface, responsiveness, performance, and theme customization features, delivering a scalable and user-friendly solution that met diverse business requirements.

Software Developer | Risk Analytics for Adolescents August 2025

POPCOM (Capstone)

- Developed and trained an AI model using real-world datasets to identify patterns and generate predictive insights, enabling data-driven decision-making.
 - Preprocessed and cleaned datasets, engineered features, and optimized model performance, improving prediction accuracy and model reliability.
 - Evaluated model performance using standard evaluation metrics and refined predictions based on analytical insights, enhancing overall system effectiveness.
-

EDUCATION

Bachelor in Information and Technology

- State University of Northern Negros
 - Thesis on "Risk Analytic System for Early Detection Adolescent Behavioral and Emotional Problems".
-
